PROFESSIONAL SUMMARY

Third-year Electronics and Telecommunication Engineering student with hands-on experience building full-stack web applications using MongoDB, Express.js, React, and Node.js. Working knowledge of machine learning concepts and integrating AI APIs into web apps. Strong foundation in computer networks and REST API design. Seeking an internship or entry-level role to build scalable, intelligent web products.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets (Socket.io)
Database: MongoDB, Mongoose, basic SQL
AI / ML: Python, scikit-learn, NumPy, Pandas, TensorFlow basics, prompt engineering, OpenAI / Claude API integration, NLP fundamentals
Tools: Git, GitHub, Postman, VS Code, Docker (basic), Vercel, Render
Core Concepts: Computer Networks (TCP/IP, HTTP/HTTPS, DNS), Data Structures, OOP

PROJECTS

AI-Powered Task Manager (MERN + AI)

React, Node.js, Express, MongoDB, OpenAI API

- Built a full-stack task management app with JWT-based authentication and role-based access control.
- Integrated an AI API to auto-generate task summaries and suggest priorities from user input, reducing manual entry time.
- Designed 15+ REST endpoints with validation and error handling; deployed frontend on Vercel and backend on Render.

Real-Time Chat Application

React, Socket.io, Node.js, MongoDB

- Developed a real-time messaging app supporting private chats, group rooms, and online status indicators.
- Used Socket.io for bidirectional communication and MongoDB for persistent message storage.
- Applied networking concepts (WebSockets, HTTP lifecycle) to optimize connection handling.

Sentiment Analysis Web App

Python, scikit-learn, Flask/Node.js bridge, React

- Trained a text classification model on a public review dataset, reaching about 85% accuracy.
- Exposed the model through an API and built a React dashboard to display sentiment results with charts.

EDUCATION

Bachelor of Engineering – Electronics and Telecommunication Engineering (ENTC)
Your College Name, University Name | Expected 2028 | CGPA: X.XX / 10
Relevant coursework: Computer Networks, Data Structures, Digital Communication, Microprocessors

CERTIFICATIONS

- Full Stack Web Development (MERN) – Platform Name
- Machine Learning Fundamentals – Platform Name

ACHIEVEMENTS AND ACTIVITIES

- Participated in college hackathon; built a working prototype in 24 hours.
- Contributed to open-source projects on GitHub.
- Member of the college coding or technical club.
